UIST 2026 Publication Guidelines

- This document has been set into **comment mode**. Feel free to comment on it if you have any questions. Remember to mention @proceedings2026@uist.org when posting your comments so that all proceedings co-chairs will get the notification. **This will ensure prompt responses from our team.**
- We also encourage authors to support each other in this process (it can be tedious and buggy). We had authors who were experts in Overleaf and Word last year who helped by answering other authors' questions.

Please submit the revised PDF and color-highlighted PDF, and complete changelogs for the 1AC to check in PCS by July 31st, 2026 AOE (July 24th for shepherd papers).

Attention: Please initiate TAPS submission by July 31st, 2026, AOE

Overview

Please note: This year's process is different from previous years.

Once you have received your conditional acceptance notification, there are necessary steps you have to complete to prepare your final submission for publication. All conference venues that publish papers and extended abstracts in the ACM Digital Library will follow this process. If you have questions, please contact the proceedings chairs (proceedings2026@uist.org). (This page is a tailored version of Final Submission Author Instructions for SIGCHI Conferences)

Some time after authors get a conditional acceptance notification, they will get an email with information about the e-Rights process. After the submitting author has filled in the ACM e-Rights form (to be completed before the "e-rights completion deadline"), they get an automated email with a link to the TAPS upload form. In parallel, authors have to apply the changes requested by reviewers to their document and format it according to the instructions in this document.

This year, authors should first revise their submissions based on reviewer feedback and submit the revised version to PCS for 1AC approval, rather than waiting for the TAPS-approved version. At the same time, authors should begin the TAPS upload process.

This year's UIST submissions are subject to page limits. For other formatting issues, such as citations, please refer to the standard UIST conference format.

Once the submission is ready, the submitting author uploads the source files to TAPS (the first version must be uploaded before the "initial upload to TAPS deadline"). TAPS will then generate PDF and HTML5 outputs from the sources and notify the submitting author of problems via email. The submitting author then needs to check whether both versions have been rendered

correctly. If not, the authors need to fix errors and re-upload the sources to TAPS. They may request help from TAPS support and publication chairs.

Regarding accessibility tagging, the accessibility chairs are teaming up with the third-party firm Aptara to make your PDF accessible.

Timeline

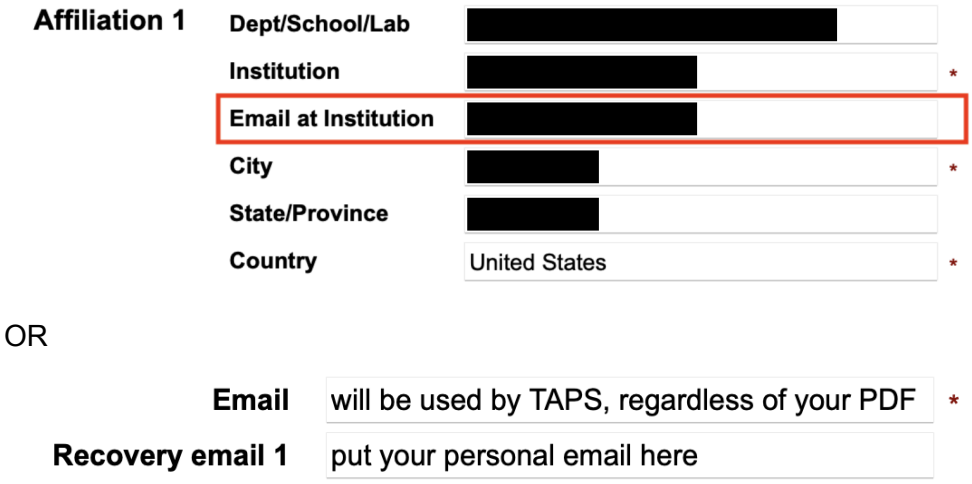

Papers

- Before signing the e-Rights form - Double check the author's information on the PCS system
- Sign the e-Rights form from rightsreview@acm.org (you will receive this form on July 7th. If not, please contact proceedings2026@uist.org ASAP.)
- 1-2 hours after signing the e-Rights form, receive the uploading link from TAPS.
- For shepherded papers, the deadline was communicated by your 1AC in the review. If not, please reach out to your 1AC.
- July 31st - Preparing your camera-ready (content-ready) paper with highlighted changes, along with a change log and submit it to PCS - You can add all authors' details in the submission
- July 31st - Prepare your documentation and upload it to TAPS (this may need some back and forth; please be patient). TAPS will generate the PDF and HTML files for your paper. (If you have initiated the process by this deadline, even if it is still under processing, you should be fine).
- August 7th - You will only receive the final notification. If there are some issues with your camera-ready, your 1AC will reach out to you directly. If there are any changes requested by your 1AC, make sure you update the TAPS version.
- August 14st - Make sure you approve the TAPS-processed PDF.
- After you upload the paper to TAPS with no errors reported, we encourage you to also go through this checklist: **Checklist for Authors UIST 2026**.
- **Do NOT make substantive changes to the text when it goes through TAPS** (e.g., only minor edits required by the TAPS staff), as we reserve the right to remove the paper from the program if we see unapproved changes to the text.
- We will prepare an accessible PDF of your paper (the one generated from TAPS does not meet all accessibility standards).
- One week before the conference - Your paper will be published in ACM Digital Library!

ACM e-Rights

After the conditional acceptance notification, you will receive an email from the ACM e-Rights system to begin the publication process for your paper. Only after completion of the form is it possible to upload the source files to TAPS.

- The e-Rights form will only be sent to the contact author, so it is important that this person is able to respond to emails and complete the form.
- This email will come from rightsreview@acm.org. Please remain alert for this email after your acceptance notification, as it may be sent to spam.
- Ensure that the paper title, author names, and emails are exactly how you want them to appear on your final publication. If you find that the information is not correct please update them in e-Rights and in PCS, otherwise, the program will be wrong. If there is a mismatch between this information and the one provided in the source file, you may have the same mismatch between the PDF, HTML of your paper, and ACM Digital Library metadata. Any mismatches will delay the publication of your paper. If you need to amend the author list, please contact the program chairs (program2026@uist.org) to get approval prior to applying the change. **Note that, in most cases, changing the author list will not be possible as conflicts during the reviewing process are handled based on the author list provided at submission time.**
- Please ensure that you and your co-authors obtain an ORCID ID, so you can complete the publishing process for your accepted paper. ACM has been involved in ORCID from the start and we have recently made a commitment to collect ORCID IDs from all of our published authors. The collection process has started and will roll out as a requirement throughout 2022. We are committed to improving author discoverability, ensuring proper attribution and contributing to ongoing community efforts around name normalization; your ORCID ID will help in these efforts.
- **NOTE: Double-check the author information on your PCS system**, which includes:
    - Name of every co-author (any special characters needed? Are they correct? **Also note that names cannot be in ALL CAPS**)
    - Are the **affiliation numbers** and **names** correct for everyone?
    - Are the email addresses correct for everyone? In PCS, update the “Email at Institution” within the affiliation fields, or change the main email addresses to your institutional addresses.

Please do take some time to check with your co-authors. For instance, take a screenshot of the PCS author list then send an email that CCs all authors. Many researchers forget to update their PCS information.

The author information shown in PCS will be associated with your e-right form. They will appear in the HTML format of your paper when added to ACM Digital Library. It may lead to inconsistency in HTML and PDF formats in the final publication. Modifying author information after submitting the e-right form can be **extremely time-consuming.**

Final Materials for Publication

The following materials are required for publication or can optionally be submitted.

Document Source for Publication (required)
The source file(s) for your submission (.docx file or .ZIP archive of LaTeX source).

Final PDF (required)
Due: July 31st, AOE
Upload the final PDF of your submission to PCS.
The final, camera-ready PDF was generated from the source file(s) by TAPS. Regarding accessibility tagging, the accessibility chairs are teaming up with the third-party firm Aptara to make your PDF accessible.

Video Preview (required)
Due: August 14th, AOE
You must submit a 30-second Video Preview by **August 14th, AOE**. using the same PCS form as the final version of your submission. A selection of video previews will be featured on the conference teaser. All video previews will be published on the UIST 2026 website and SIGCHI YouTube channel no sooner than two weeks before the start of the conference.

- Video previews are mandatory.
- Recommended resolution: 1080p (1920 x 1080) or 4k (3840 x 2160 px), encoded as MP4 using the H.264 codec
- Length: 30 seconds
- Size: < 150 MB
- Subtitles are required using a separate .srt or .sbv file
- Please see the video guide for detailed instructions

Video Figure (optional)
Due: August 14th, AOE
You may include a 5-min video figure that accompanies your paper by **August 14th, AOE** The video must include an opening title and all spoken dialog should be closed captioned (subtitled) to improve accessibility. See Technical Requirements and Guidelines for Videos at SIGCHI for details.

- Video previews are optional but highly recommended.
- Recommended resolution: 1080p (1920 x 1080) or 4k (3840 x 2160 px), encoded as MP4 using the H.264 codec
- Length: 5 minutes
- Size: < 200 MB
- Subtitles are required using a separate .srt or .sbv file

Please see the video guide for detailed instructions

Supplemental Materials (optional)
Due: July 31st, AOE
Supplemental Materials are optional but must be uploaded as a single ZIP file. This material will only appear in the ACM DL. The ZIP file can contain survey material, source code, data, images, additional videos, slides, etc. Sharing research material to facilitate replicability is optional but recommended. If you submit supplemental materials, a readme file called README.md must be provided describing the files included in the ZIP file. This description should include, for example, the file types contained in the ZIP file, the software needed (if any) to view or execute the files, and any other relevant information explaining how the supplemental material relates to and supports the ACM submission. If you uploaded supplemental materials, but you did not provide a README.md file, your supplemental material will not appear in the ACM DL.

¥

Preparing Your Final Source

All authors should ensure they are using the latest version of the template available on the ACM Templates page.

Word Authors

NOTE: If your paper submission was made using Word and is in **double-column format**, it'll not be compatible with TAPS and you need to reformat your paper using the **single-column template** for the camera-ready version.

After downloading the correct ACM Master Article Template for Microsoft Word, you need to follow the instructions in this PDF file to attach the ACM Template to your submission file:

- Attach the Template from the downloaded location to your submission file.
- Apply appropriate style to each element of Head, Body and Reference. For this, please check Table 1 in the original Submission Template file, which contains a list of the styles you should apply.
- Run Crosslinking to auto hyperlink all citations from the Template ribbon.
- Press the 'ACM Template' button and run 'Manuscript Validation'.
- The validation process was successful. Then ZIP your submission, following the established format, and upload it to TAPS.
- If validation does not work after following the steps above, please contact confsupport@aptaracorp.com and proceedings2026@uist.org

Please note that you must run the "Manuscript Validation" macro on your Word document, and have it complete before uploading the Word document to TAPS.

Word authors should follow these instructions.

- Use a filename that does not contain spaces and special characters.
- Please ensure that ALL content in your Word document is styled with the correct styles as listed in the table provided in the template.
- Use numbered style for Bibliography.
- There are some common issues that can delay the processing of your publication. Please check for the following in your final version:
- Ensure elements such as the title, headings, authors, acknowledgments, reference heading, and individual references are styled as described in the template.
- If a single figure contains multiple images, these must be inserted as a single image.
- All images/figures are of appropriate quality (to be able to be converted in required formats for HTML version) and must be followed by a caption.
- Provide alt text (instructions available in the template) for all figures.
- Remove all blank lines.

ACM's Computing Classification System (CCS) is a taxonomy for the computing field. Authors are expected to select one or more descriptors (or "concepts") from the CCS and add them to your document.

A list of CCS descriptors can be built for your article from https://dl.acm.org/ccs/ccs.cfm. Authors can select one or more descriptors and assign a priority to them. When a list of CCS descriptors has been built, that information must be added to your document. In Microsoft Word, adding CCS concepts to your document is a two-step process:

- Select the formatted list of concept(s) from the Web interface – here's an example:
    - Computer systems organization~Real-time operating systems
    - Paste it into your document, and style with the "CCSDescription" tag.
- Select "view CCS TeX Code" and check the "Show the XML only" box, copy the XML and paste into your Word document in the following location (Mac):
    - Select "Properties" from the "File" menu
    - Select the "Summary" tab
    - Paste the XML into the "Comments" area
- Select "view CCS TeX Code" and check the "Show the XML only" box, copy the XML and paste into your Word document in the following location (Windows):
    - Select "Properties" from the "File" menu
    - Select "Advanced Properties"
    - Select the "Summary" tab
    - Paste the XML into the "Comments" area

It is important to perform both parts of this task – inserting the formatted list into the body of your Word document and applying the appropriate style, AND inserting the XML representation of your selected CCS concepts into the metadata of your Word document.

Frequently Asked Questions About Word:

- Zotero Bibliography Tip: if your Zotero references are linked, you get a 'please structure Refs first' error when you use 'Reference and Cross Reference> cross-referencing>float and bibliography', as the Bib_entry body element does not apply to a Zotero-linked bibliography. Try to cross-reference float and bibliography after unlinking Zotero bibliography (make backups in case this doesn't work) - following this video (https://www.youtube.com/watch?v=sUGEoPaXRKQ). You should get prompts for ACM Bib placement and style.

- Feel free to add your question here (keep in bullet points) and mention @ proceedings2026@uist.org

LaTeX Authors

LaTeX source requires some preparation for final submission, please go through the ACM's LaTeX best practices guidelines available here. Please ensure your source follows these requirements:

- SIGCHI publications use the "sigconf" visual style. This is specified in the document class command. You should use \documentclass[sigconf]{acmart} (removing other tags such as "manuscript", "authordraft", "anonymous" and "review"). Please also make sure to use coding of basic elements as per the sigconf sample tex file available with the acmart LaTeX package.

- All images are of appropriate quality (to be able to be converted in required formats for HTML5 version)
- SIGCHI publications use the “ACM-Reference-Format” numbered bibliography style.
- Your LaTeX source must have a single “main” .tex file, although you can organize your project with a main .tex file that includes input from multiple .tex files. Please remove all samples and old tex files that include a document class.
- Ensure that your source compiles without errors. Some editors, such as Overleaf, will tolerate errors and generate a PDF, but this is not permissible for final publications. Please check the error log and correct all compilation errors before submitting your final source.
- Ensure that your bibliography compiles. Accurate bibliographies are required for publication. If your bibliography has missing entries or other errors, your source will not be accepted for publication. Please check the warning log and correct all warnings and errors related to your bibliography before submitting your final source.
- Ensure you check the list of approved packages for LaTeX documents. If you use a package not listed, please remove it early on as otherwise it will not be possible to process using TAPS. Packages can be asked to be added to the list, and you can always contact acmtexsupport@aptaracorp.com if you have questions.
- Provide descriptions (instructions available in the template) for all figures.
- You need not include any of the ACM article class files (acmart.cls, etc.)
- You need to include the rights commands sent to you (in the email with the e-Rights form) when you complete your rights form to the source of your article before delivering it to TAPS. (If you do not have it by the time of camera-ready, make sure you have added it when you upload your file to TAPS)

Overleaf users can download LaTeX source files in a ZIP format by clicking the “Menu” button on the top-left corner and then clicking the “Source” icon in the “Download” section. Note that all samples and old tex files need to be deleted (see the above requirements) on Overleaf before downloading the ZIP file; this can be done by right-clicking each unnecessary file and then selecting the “Delete” option. Authors who need technical support about Overleaf should contact support@overleaf.com

Frequently Asked Questions About LaTex:

- Most of the answers can be found in **LATEX Class for the Association for Computing Machinery**
    - For authors who have multiple affiliations, please check page 10

- If you want to have cross-column figures or tables, you need to use \begin{figure*}, \end{figure*} or \begin{table*}, \end{table*}.

- Feel free to add your question here (keep in bullet points) and mention @ proceedings2026@uist.org

- I received email from TAPS Support staff who rejects my files and says that “your conference is following the style of reference is (Author Year style)”; can you confirm that? The UIST template uses numbered bibliography style. I am confused what referrence style to use. @proceedings2026@uist.org.
-

Using the ACM Publication System (TAPS)

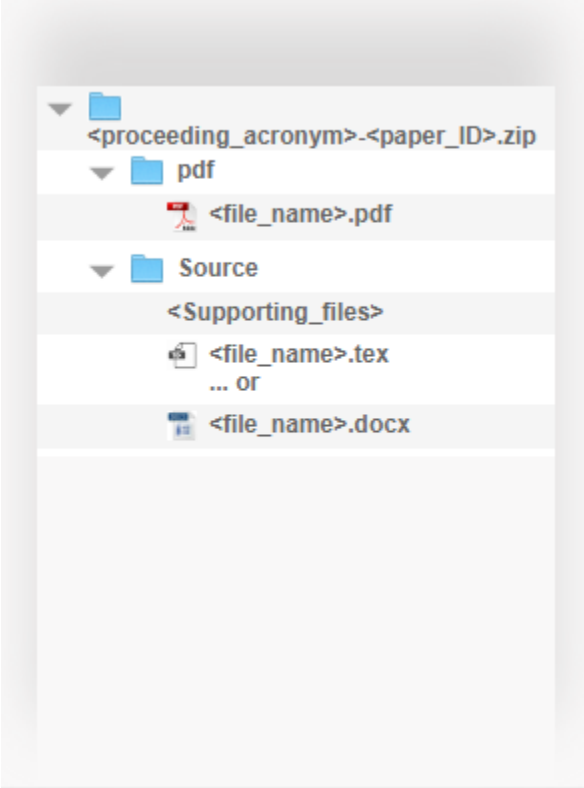

Follow the ACM Instructions for Submitting the Author’s Paper/Article to TAPS. Please note that this will be an iterative process. The following is a summary of the steps to follow. For more details, refer to the ACM Instructions.

1. Prepare your materials: create a ZIP file following the specifications. Please check that you are using the correct names for folders and files.
    a. More information on using Microsoft Word to prepare your article can be found in this document: https://homes.cs.washington.edu/~spencer/taps/article-word.html
    b. More information on using LaTeX to prepare your article can be found in this document: https://homes.cs.washington.edu/~spencer/taps/article-latex.html
2. Delivering your material: submit your ZIP file to TAPS using the link sent to you by TAPS.
    a. *Strongly recommend as it’ll speed up your iteration process* If the ZIP file is less than 10MB in size, use the file uploader on that page.
    b. If the ZIP file is 10MB or greater in size, use the FTP link on that page.
    c. Only include the actual files in the Source folder. DO NOT include the supplemental files in the ZIP.
3. Processing your material: TAPS will attempt to build the PDF and HTML5 versions of your article.
    a. If TAPS is successful, you will receive an email with the PDF as an attachment, and a link to the HTML5 version. If you need to correct something, you have the option to reject the outcomes and resubmit your revised ZIP file.
    b. If not successful, you need to read the error messages, fix your files and resubmit. If you are not able to fix the errors you can contact the publications team (proceedings2026@uist.org) or APTARA support via the contact form or tapssupport@aptaracorp.com.

Some important notes:

- **Names are important:** Make sure you accurately name the subfolders (pdf, Source) following this figure. You can temporarily give any name for the zip file for PCS. (Once

you receive the upload link from TAPS, you need to rename the zip file accordingly. Note: you need to unzip the file to rename it and then zip it again so that the file name after unzipping can stiuist ll be correct.)

- Filenames (including figures in the paper) should ONLY include upper- and lower-case letters, numbers, the dash "-" and underbar "_" characters. (The period between the filename and the file extension - "figure7.png" is fine.)
- A figure named "figure 1.png" may lead to problems in TAPS. Because it has space " " in the middle. It should be changed to "figure_1.png".
- The folder name seems to be "**Source**" rather than "source" in the current TAPS uploading instructions. Please test with it, especially for big-file uploading link

---

Approving Your Final Submissions in ACM TAPS

After the final submissions are processed by TAPS, you will receive an email asking you to approve your final version for publication. The link provided will take you to the TAPS Author Dashboard for your paper.

- The TAPS Author Dashboard email will only be sent to the corresponding author, so it is important that this person is able to respond to emails and complete the form.
- This email will come from tapsadmin@aptaracorp.awsapps.com. Please remain alert for this email after you have uploaded your source, as it may be sent to spam. This may

take up to two weeks to arrive, depending on the size of the conference and the processing required.

- When you receive an email titled “PDF and HTML Proofs: available for review” please follow the links provided to access the TAPS-generated PDF and HTML files.
    - Carefully review the generated files and check for rendering problems or missing content.
    - If you approve the proofs, make your PDF accessible by following the instructions provided in the email or using the following link https://sigchi.org/conferences/author-resources/accessibility-guide/. Your submission is complete and ready for publication in the Digital Library.
    - If you do not approve the proofs, you can revise your source files, create the ZIP file again and submit it to TAPS. Submit your final accessible PDF and the corresponding source file (Word or LaTeX source) to PCS.

Uploading Your Final and Approved Documents to PCS

In the final step, the accessible proofs now need to be uploaded to PCS for the associated chair (AC) or venue chair to review. Additionally, it is required to submit a summary of changes for some venues, like Papers. Based on this, the AC or venue chair will make the final decision on the acceptance of the paper, thus triggering the final acceptance email.

General Questions

Q: What do I do if I do not get a response email from TAPS after submitting?
A: If you have not received a notification email after 24 hours, contact confsupport@aptaracorp.com and proceedings2026@uist.org

Q: My final PDF or HTML is showing the wrong metadata (e.g., author name, email, title). What can I do?
A: This requires the proceedings chairs to help you out. Please reach out to proceedings2026@uist.org

Q: What if I do not have Adobe Acrobat Pro DC for adding the accessibility tags to the PDF?
A: Reach out to the accessibility chairs (accessibility2026@uist.org)

Q: TAPS did not provide me with my final PDF in time. What should I do?
A: Reach out to proceedings2026@uist.org before the deadline—we will make sure that you have the time needed to review your final version.

Q: Does my final PDF have to contain author names and affiliations?
A: Yes.

Q: Should the version in TAPS be the redline version of my paper?
A: No, this should be the final version you want to see in the ACM DL.

Q: Does TAPS generate a PDF with changes highlighted?
A: No, you need to generate a PDF with changes highlighted yourself if you wish to do so.

Q: Can I upload a different PDF file to PCS?
A: Yes, the PDF can be the pre-TAPS version.

Q: What do I do if I want to reupload my paper to TAPS after I have approved it?
A: Reach out to proceedings2026@uist.org

Q: What do I do if my paper title has changed?
A: Reach out to proceedings2026@uist.org

Q: What do I do if any information about the displayed authors is wrong (PDF or HTML)?
A: Reach out to proceedings2026@uist.org

Q: TAPS does not allow me to upload a new version. What can I do?
A: Reach out to proceedings2026@uist.org

Q: TAPS support is not responding. What can I do?
A: Reach out to proceedings2026@uist.org so we can follow up on your problem and also know about your situation. However, the TAPS support team is currently slow due to the high load of requests.

Q: Do I need to upload my supplemental material to TAPS?
A: No, only to PCS. Only the materials in PCS will go into the ACM DL.

Q: Do I need to upload my companion videos to TAPS?
A: No, only to PCS. Only the videos in PCS will go into the ACM DL and YouTube.

Q: Can I upload more than 10MB per ZIP?
A: Yes, but this massively delays your processing; thus, we ask you to keep your ZIP files under 10MB.

Q: Am I required to manually add accessibility to my PDF?
A: You can choose to opt-in or opt-out of tagging your own TAPS-approved PDF.

Q: Which LaTeX packages are accepted to be used?
A: See https://www.acm.org/publications/taps/accepted-latex-packages

Q: Do I need to clear my document source files (Word or LaTeX)?
A: No, your source files are likely to never be looked at. It provides us with the ability to recompile your PDF in case we can not reach you.

Q: Do I need to include my final PDF and/or supplementary materials in the ZIP I need to upload to TAPS?
A: No, UIST'26 ignores all additional files uploaded to TAPS, please only upload your extra files to PCS.

Q: What is the expected format for "ACM Classifications" input field in PCS?
A: Go to https://dl.acm.org/ccs, when you click the "generate code" button, you can see a pop-up, there is a gray button on the pop-up "view CCS Display". If you click that button, the text board will change to the text version. Simply copy it and paste it into PCS.

Note:

Common TAPS Error: You must include the \country{<your_country>} command in your affiliations

Common TAPS Error: You must use \begin{acks} and \end{acks} for the Acknowledgements section

Feel free to add your question here (keep in bullet points) and mention @ proceedings2026@uist.org

Q: Can the acknowledgements be placed~~place~~ over page-limit? ~~Q: Can the Acknowledge!~~

Technical Support

ACM is happy to provide authors working with LATEX class and Word files technical help. Please direct your technical query to: acmtexsupport@aptaracorp.com for both LaTeX and Microsoft Word inquiries.

Note: TAPS support team can be super busy and may not be that responsive during the conference publication season. We recommend you check this guideline first, or post your questions or comments on this document before turning to the TAPS support team. If you indeed meet with weird problems, yes, send an email to them directly!
